## **INTRALOGISTICS**

Intralogistics includes the organization, management, implementation and optimization of the internal flow of materials and information in all industries, and, as one of the key links in the supply chain, intralogistics is highly susceptible to the implementation of solutions that optimize and improve the complete logistics in one company, which will significantly reduce costs, increase productivity and raise the level of competitiveness in the market.

## **ROAD TRANSPORT**

Road transport is the most massive form of freight transport on short and medium distances. It is characterized by great maneuverability, pronounced mobility, autonomy of vehicles, high speed delivery, door-to-door delivery. New technologies bring many opportunities for advancement, and will be presented as part of the Road Transport session.

## **PORTS AND TERMINALS**

Session dedicated to ports and terminals is aimed to improve cooperation between water transport participants. This session will cover the topics of intermodal transport, ports connectivity, infrastructure, services, as well as available innovative technologies, forthcoming projects for expansion and enhancing port capacities, creation of environmentally friendly and sustainable facilities, as well as new markets and freight flows.

## **XI International conference INTRALOGISTICS**

Intralogistics Conference is the must-attend event for logistics professionals from leading companies in SEE region. Join them and experts and thought-leaders for a series of refreshingly interactive discussions into how advances in warehousing and material handling technology and new solutions are driving efficiency gains throughout the intralogistics sector.

## **XI International conference ROAD TRANSPORT**

Road Transport Conference covers all challenges in modern distribution: sustainability, electrification, routing, day to day delivery, last mile delivery, workforce, legal issues... Our bespoke agenda was crafted by industry, for the industry with carefully selected themes and discussions to provide a conclusive guide to transport strategy. All day long of live discussions will discover the latest technologies and strategies from leading experts in the industry.

## **III International conference PORTS AND TERMINALS**

Third International Conference Ports and Terminals brings together key participants in water transport - ports representatives, shipping companies and terminals, representatives of relevant state institutions and logistic experts, to facilitate information sharing, networking and cooperation, in order to address existing and new challenges and advancement of water transport in the region.
